

A-dec 3000

Reach your
pote

Focus on your wellbeing

A-dec 300 is designed for the health of your practice. Because your every movement counts, every detail matters. That's why A-dec 300 is setting a new benchmark for optimal ergonomics, smart efficiencies, and lasting value. By asking what's going to help you feel great at the end of every day, A-dec has arrived at a treatment room solution that ensures an easy, continuous flow that is as healthy as it is natural.

ntial

Everything working together

The A-dec 300 delivery system plays well with technology. Compact in size, big in seamless integration. Besides a syringe and electric handpieces, you can integrate up to two accessories including intra-oral camera, curing light or ultrasonic instrument. Plus, the delivery system platform design allows you to add future products. Take full advantage of integration with the A-dec 300 deluxe touchpad. Control your equipment, handpieces, and integrated accessories with a touch of a button.

Looks *are* important, too

Does your current treatment room reflect how much you care? And does it convey the importance of a safe, high-quality, and technology-savvy practice? The advanced design of A-dec 300 is sure to make the right impression with patients and your staff. A perfect blend of style and function.

Experience essential design

Get what you need

We've distilled the most essential features into one pure solution. Simple. Smart. Stylish. A-dec 300 brings you exactly what you need with an added bonus—it's from A-dec, so you know it's built to last.

Combine flexibility with what's proven

Versatility and simplicity. The integrated design and wide range of options create a smart, flexible system to clear the way for easy-reach instrumentation and uninterrupted care. In short, A-dec versatility adds simplicity.

With the option of a Radius®-style delivery system, you not only gain a dynamic arc for left- and right-handed operators, but you're also accommodating a wide range of work styles today and for the future.

Ease that's nicely *out of sight*

The left/right-compatible assistant's arm features four pivot points to place instruments exactly where you want them. And because it rotates around the back of the chair, you gain an obstruction-free configuration that patients never see. The A-dec 300 assistant's arm features:

- Adjustable 3- or 4-position holder with autoclavable quick-disconnect (QD) syringe, HVE, and saliva ejector
- Assistant-side programmable chair touchpad
- Easy-access solids collector

Better access

With A-dec 300 you get better access than with any other product in its category. The thin, narrow back, low base-down position, and small, contoured baseplate allow you to get closer to your patient. You no longer need to lean in, reducing strain and fatigue.

Robust design

In this case, less equals more. The robust design is engineered with fewer parts to maintain, fewer parts to replace, and less to clean. And yet there's no compromising comfort or lack of integrated ancillaries that scale with the needs of your practice.

Small footprint

A-dec 300 does everything you need *and* stays out of the way. Ideal if you need to maximize space or if you simply want to create a clean, minimal environment. Compact control head, integrated floor box, small baseplate, and the option of Radius-style or dedicated left/right delivery create one of the smallest dental equipment systems available today.

Achieve **balance**

Create time for your priorities

If it took you less time to complete each procedure, what would you do with the extra time in your day? Increase the number of procedures? Take more time to visit with patients? Or maybe you'd cut back the hours you work each week to spend time with your family, pursue a hobby, or volunteer in your community. No matter what your priority, A-dec 300 allows you to do more of what's important to you.

Gain a healthy balance sheet

Your equipment quality has a direct impact on your practice profitability. From less down time to increased efficiencies to improved quality of service, A-dec 300 not only has the potential to add profit to your bottom line, but you also get the most for your money with proven innovations.

Expect more

It's from A-dec

You can rely on our equipment to work day after day, year after year. Plus, you get it all backed with unrivaled support. Some companies offer warranties that last a few years and call it good. We offer a lifetime relationship with our customers and call it A-dec.

World-class customer service

We're committed to you, your practice, and your success. When you call us, you get the answers you need. We provide solutions to your concerns. Listen to your ideas. It's what makes us different. And it's one of the reasons why A-dec is a worldwide leader in dental solutions.

Exercise your options

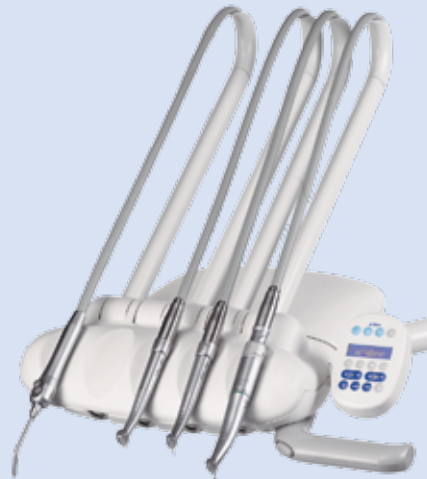

Work your way

Choose what's right for you. The modular design of the A-dec 300 system allows you to select the combination of options that best complements how you work.

Cuspidor

The contemporary cuspidor design features a modern-style, removable glass bowl. Attached to the support center, it allows easy access for patients. Includes timed cup fill and bowl rinse functions.

Continental

Traditional

Delivery systems

Compact in size. Big in function. Both the traditional and Continental® delivery systems can integrate a quad-volt intraoral light source and two ancillaries.

Standard touchpad

Deluxe touchpad

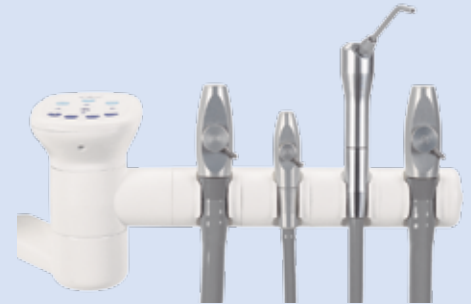

Touchpads

The optional touchpads feature intuitive, user-friendly icons. The deluxe touchpad not only controls the chair, cuspidor, and dental light, it also controls ancillaries and electric handpieces. Plus, it has endodontic capabilities*.

*Requires EA-52LED electric motor.

3-position holder

4-position holder

Dual 2-position holder (international only)

Assistant's holders

Choose from 3- or 4-position holders on a cuspidor-mount, telescoping or Radius-style assistant's arm. Either way, comfortably access vacuum instruments while working without an assistant. An assistant's touchpad is also available.

Dental lights

Whether your choice is A-dec LED or A-dec halogen, get balanced intensity and a uniform light pattern without unwanted shadows. Plus, automatic on/off when the chair moves to the entry/exit position.

A-dec LED light

A-dec 500 light

A-dec 300 light

Monitor mount

The monitor mount positions easily over the patient for convenient patient consultation and education.

Radius-style delivery

Rotating arms for delivery and assistant's instrumentation simplify left/right compatibility and allow you to place instrumentation right where you need it.

Compatibility

Looking to upgrade your operatory, but keep your existing chair? The A-dec 300 support center and delivery system can attach to your existing chair to easily infuse integration into your treatment room.

To explore all that A-dec 300 can do for you, your practice, and your patients, go to a-dec300.com to learn more and locate your nearest, authorized A-dec dealer.

Quick facts

Chair

- Double-articulating headrest or patient-adjustable neck support
- Thin-line 1.5" (38 mm) backrest
- Range of lift height: 13.75"-29.5" (349 mm-749 mm)
- 2-position armrests for easy patient entry/exit
- Seamless or sewn upholstery
- Exposed toeboard for easy cleanability on seamless-style upholstery
- Radius-style delivery option
- Integrated or positionable contoured floor box with utilities
- Integrated power supply

Support center

- Dedicated left/right assistant's arm
- For an A-dec 361 support center, a chair-base mount is required with the A-dec 300 chair
- For all non-A-dec 300 chairs, a support center system provides a mounting point for the A-dec 300 delivery system and additional equipment; dedicated left or right

Delivery system

- Continental or traditional delivery system options
- Radius-style delivery for left or right capability
- Support center-mounted delivery for dedicated left or right applications
- Four handpiece holder positions
- Flexible delivery system positioning for enhanced ergonomics
- Standard 3-position control block, or optional 4-position (three wet)
- Balanced flexarm with air brake
- Control head accommodates two integrated ancillaries
- Autoclavable quick-disconnect (QD) syringe
- Optional quad-voltage intraoral light source with independent adjustment settings for 4 positions
- Wet/dry foot control
- Choice of optional standard or deluxe touchpads
- Large or small tray holders
- 2-liter self-contained water system with QD water bottle
- Easily-replaceable cartridges for simplified maintenance

Additional Equipment

- Choice of Radius-style, cuspidor-mounted or telescoping assistant's instrumentation with 3- or 4-position holders
- Glass bowl cuspidor with adjustable cup fill and bowl rinse timers
- Ask about the A-dec LED light, which gives you three levels of neutral white brightness plus a cure-safe mode. Its three-axis positioning and 540° of rotation ensures unparalleled ergonomics.
- Monitor mount accommodates most 15" (381 mm), 17" (432 mm), and 19" (483 mm) flat-panel monitors
- Monitor mount rotates and tilts for multiple viewing angles

Get to know the family

A-dec 300 is just the beginning. At A-dec, we offer a complete line of healthy dental equipment solutions.
