# Service and Inspection Pricelist

# Equipment servicing with SPS

THE NEED FOR CONTINUOUS CARE OF THE DENTAL EQUIPMENT AT YOUR PRACTICE IS JUST AS IMPORTANT AS THE CARE YOU GIVE TO YOUR PATIENTS

The service and repair of dental equipment has never been more important, especially with regular periodic inspections by the care quality commission and the drive to keep dental practices compliant.

The effects of neglecting essential maintenance could be detrimental to your business, with faulty equipment causing surgery downtime as well as increased reactive engineer call out costs.

SPS Dental have a number of engineers that are fully trained by the leading UK equipment manufacturers, who can service and maintain your equipment to the highest standard using genuine approved parts.

All prices include labour
