

Carbon Reduction Plan

Supplier name	SPS Dental
Publication date	21 st September 2026

Commitment to achieving net zero

SPS Dental Sales Limited is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2025 (year ended 30 June 2025)	
Additional details relating to the baseline emissions calculations:	
First formal baseline. Scope 1 and Scope 2 calculated from available activity data. Scope 3 included sources are employee commuting and business travel by employee-owned cars. Additional required Scope 3 categories are recorded but not numerically quantified where activity data is unavailable.	
Baseline year emissions:	
Emissions	Total (tCO₂e)
Scope 1	20.58
Scope 2	2.65
Scope 3 (included sources)	12.52*
Total emissions	35.75*

Current emissions reporting

Reporting year: year ended 30 June 2025	
Emissions	TOTAL (tCO₂e)
Scope 1	20.58
Scope 2	2.65
Scope 3 (included sources)	12.52*
Total emissions	35.75*

Emissions reduction targets

In order to continue our progress to achieving net zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 28.60 tCO₂e by 2030. This is a reduction of 20%.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2025 baseline. No separate carbon reduction achieved since the baseline has been quantified; the measures will be in effect when performing the contract.

- A hybrid company vehicle is included within the company fleet.
- No business air travel was recorded for the baseline period.
- Annual electricity consumption has been identified and recorded for ongoing monitoring.
- SPS Dental has established its first formal carbon baseline and annual reporting process.

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

Reviewing replacement of diesel vans with electric or lower-emission alternatives when operationally suitable; reducing unnecessary business mileage through route planning, combined visits and virtual meetings where appropriate; improving energy efficiency and assessing renewable electricity options; improving supplier and carrier data for inbound and outbound transport; improving waste data; recording rail distances and hotel nights; maintaining an annual employee commuting survey; and reviewing this Carbon Reduction Plan annually.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

* Scope 3 included-source figure of 12.52 tCO₂e comprises employee commuting and employee-owned-car business travel. The available data for upstream transportation and distribution, waste generated in operations, rail/hotel business travel and downstream transportation and distribution is recorded in this CRP and will be quantified using documented methodology as activity data improves.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate [government emission conversion factors for greenhouse gas company reporting](#).¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been

reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the supplier:

A handwritten signature in black ink, consisting of a stylized 'S' followed by a horizontal line and a small loop.

Annex – Guidance notes

- Please provide details of your organisation's baseline emissions. If your organisation has not previously assessed or reported emissions, please state this and use your first reporting period as your baseline.
- Under **Additional details relating to the baseline emissions calculations**, please add details of your baseline emissions as required: for example, that it is a historic baseline which deviates from the requirements under this measure (e.g. no prior Scope 3 emissions reporting); that there had been no previous reporting; or that you have created a new baseline due to substantial organisational change or restructuring.
- Under the heading **Emissions reduction targets**, if your organisation already has emissions reduction targets, please give those targets. If your organisation had no previous emissions reduction commitment, or if this is your organisation's first carbon footprint, please provide targets for your organisation. You may want to show progress against your targets in a graph, like the one show below:

the heading **Completed carbon reduction initiatives**, please provide brief details of some of your completed carbon reduction projects. This is for information only. This may include environmental management measures such as certification schemes like ISO14001 or PAS 2060, signing up to SBTi or specific measures you have taken such as: the adoption of LED/PIR lighting controls, changes to policy resulting in a reduction in company travel and flights or the electrification of the company fleet.

- Under the heading **Future carbon reduction initiatives**, please provide brief details of some of your likely/proposed future carbon reduction projects, if any. This is for information only.
